

# **'PCI Complications - management and troubleshooting masterclass'**

**Thursday 14 October 2010, 8.45 am – 4.30 pm**

**Worcestershire Royal Hospital**

**Main Lecture Theatre, Charles Hastings Educational Centre.**

## **Meeting Objectives**

**This meeting will be of interest to all interventionists and trainees.**

Continuing improvements in techniques and technology have made PCI an ever safer procedure. Major complications have become less common, and consequently it takes longer for most operators to acquire the experience to manage serious problems effectively. This meeting provides a forum to review and discuss the major PCI procedural complications and post-procedure issues, with an emphasis on sharing the expertise of highly experienced operators

## **Topics include**

**Overview of PCI complications** – what the BCIS database tells us

**Problems with access - radial and femoral** guide cath dissection, bleeding, haematomas, false aneurysms and worse; closure devices, vascular surgery?

**Coronary perforation** by wires, balloons & stents. Emergency management

**Intracoronary issues – dissection, occlusion** how to avoid and manage

**Haemodynamic instability, no-reflow, shock** stuff hitting the fan

**Complications of Bifurcation Techniques.** keeping it simple?

**Lost and Found** retrieval of stents wires and other missing objects

**Thrombosis** - procedural, subacute and late

**Bleeding complications** data DAPT + OAC new stuff: Xa inhibitors?

**Strategic planning to avoid problems** thinking it through beforehand

**plus your astounding video cases**

## **Faculty**

**Chamberlain-Webber Davies Doshi Gershlick Grech Gunning Khattak  
Ludman Norell Kharbanda Pitt Prasad Routledge Scriven Trevelyan**

## **Contacts**

**Free registration now!**
